

CSS

dropdown menu example , media query

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
  <style>
    header{
      background-color: #333;
      color: white;
    }

    ul li{
      display: inline-block;
      padding: 10px;
      cursor: pointer;
      position: relative;
    }
    .active{
      display: none;
      position: absolute;
      background-color: #5f5e5e;
      top: 100%;
      left: 0;
      margin: 0;
      padding: 0;
    }

    ul li:hover .active{
      display: block;
    }
  </style>
</head>
<body>
  <h1>Dropdown menu</h1>

  <header>
    <nav>
      <ul>
        <li>Product
          <div class="active">
            <ul>
              <li>Mobile</li>
```

```

        <li>Laptop</li>
        <li>Computer</li>
      </ul>
    </div>
  </li>
  <li>Service
    <div class="active">
      <ul>
        <li>mobile service</li>
        <li>Laptop service</li>
        <li>Computer service</li>
      </ul>
    </div>
  </li>
  <li>Contact us</li>
</ul>
</nav>
</header>
</body>
</html>

```

Media.html

```

<!doctype html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Media queries</title>
    <style>
      body{
        background-color: aqua;
      }

      .container div{
        width: 200px;
        height: 200px;
        background-color: red;
      }
      .container{
        display: flex;
        gap: 20px;
        /* flex-wrap: wrap; */
      }

      @media (max-width:478px) {
        body{

```

```

        background-color: yellow;
    }

    .container{
        flex-direction: column;
    }
}

@media (min-width:479px) and (max-width:1024px) {
    body{
        background-color: blueviolet;
    }
}
@media print{
    body{
        background-color: black;
    }
}
</style>

</head>
<body>
    <h1>Media query</h1>

    <div class="container">
        <div></div>
        <div></div>
        <div></div>
        <div></div>
        <div></div>
    </div>

</body>
</html>

```

Theory Notes

1. Media Queries

- **Definition:** CSS feature that allows content to adapt to different screen sizes or devices.
- **Syntax:**

```

@media (condition) {
    /* CSS rules */
}

```

- **Common conditions:**
 - `max-width` → applies styles when screen width is less than or equal to value.
 - `min-width` → applies styles when screen width is greater than or equal to value.
 - `print` → applies styles when printing.
- **Use case:** Responsive design (mobile, tablet, desktop).

2. Dropdown Menus

- **Definition:** A navigation element that reveals hidden options when hovered or clicked.
- **Implementation:**
 - Use `ul li` for menu items.
 - Use `position: relative` for parent and `position: absolute` for dropdown.
 - Use `:hover` to toggle visibility.
- **Use case:** Navigation bars, product categories, settings menus.

Media Queries

1. Create a webpage with 5 boxes in a row.
 - On screens smaller than 480px, stack them vertically and change background to yellow.
 - On screens between 480px and 1024px, change background to violet.
 - On print, set background to black.
2. Add a hover effect to each box so it scales up slightly when hovered.

Dropdown Menu

3. Build a navigation bar with three items: **Product**, **Service**, and **Contact Us**.
 - On hovering over **Product**, show a dropdown with **Mobile**, **Laptop**, **Computer**.
 - On hovering over **Service**, show a dropdown with **Mobile Service**, **Laptop Service**, **Computer Service**.
 - **Contact Us** should not have a dropdown.
4. Style the dropdown so that it appears directly below the parent item with a dark background.
