

Full Stack (React + mysql + Node) Test

Time: 3 Hours

Max Marks: 100

✔ Section A – Short Answer (2 Marks × 20 = 40 Marks)

Answer all questions:

1. What is React?
 2. What are props in React?
 3. What is list rendering in React?
 4. What is conditional rendering?
 5. What is the use of useEffect hook?
 6. What is useRef used for?
 7. What is the difference between controlled and uncontrolled forms?
 8. What is useReducer?
 9. What is Context API?
 10. What is React Router?
 11. What is Axios used for?
 12. What is Redux?
 13. What is Node.js?
 14. What is HTTP?
 15. What is a custom module in Node.js?
 16. What is middleware in Express?
 17. What is JWT authentication?
 18. What is DDL in MySQL?
 19. What is a JOIN in SQL?
 20. What are aggregate functions?
-

✔ Section B – Short Programs / Explanation (5 Marks × 8 = 40 Marks)

Answer all questions:

21. Write a simple React component using props.
22. Write a React example for list rendering using map().

23. Write a small example using useEffect.
 24. Write a React form using controlled components.
 25. Create a simple Express server.
 26. Write a basic REST API (GET method) in Express.
 27. Write SQL query to create a table and insert values.
 28. Write a Node.js example using fs module to read a file.
-

 Section C – Application / Mini Tasks (10 Marks × 2 = 20 Marks)

Answer any TWO:

29. Create a simple CRUD API using Express and MySQL.
30. Explain Redux flow with a simple example (action, reducer, store).
31. Build a React component that fetches data using Axios and displays it.
32. Explain JWT authentication flow in a Node.js application.
